REASONS FOR ALLOWANCE

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-12, wherein a diaphragm device comprises two base plates disposed in the vicinity of a light source, each of which having an aperture for an optical path, two stopping-down blades that are disposed in the accommodating chamber and move toward or away from the apertures, wherein an adjacent-to-the-light-source surface of a member exposed to the light of the light source are provided with grey or white heat-resistant painting, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references are cited for disclosing an device a diaphragm with a design to compensate for lamp color temperature, but said reference(s) does not disclose a diaphragm device comprising two base plates disposed in the vicinity of a light source, each of which

having an aperture for an optical path, two stopping-down blades that are disposed in the accommodating chamber and move toward or away from the apertures, wherein an adjacent-to-the-light-source surface of a member exposed to the light of the light source are provided with grey or white heat-resistant painting, as claimed: Hagner et al.
